

# Meet Relay.

A shipping and return system that works for you.  
**And your customers.**

**Amount of consumers who say they'll buy again from brands that offer easy returns**

Let's give them what they want — while making your customer service team's job easier than ever.

## How Relay Works

### Out-of-the-box integration

Relay instantly integrates with all of the order management, e-Commerce and catalog systems you use every day.

### Real-time status updates

Create opportunities for engagement while providing up-to-the-minute updates on each shipment's route and ETA.

### Faster, easier returns

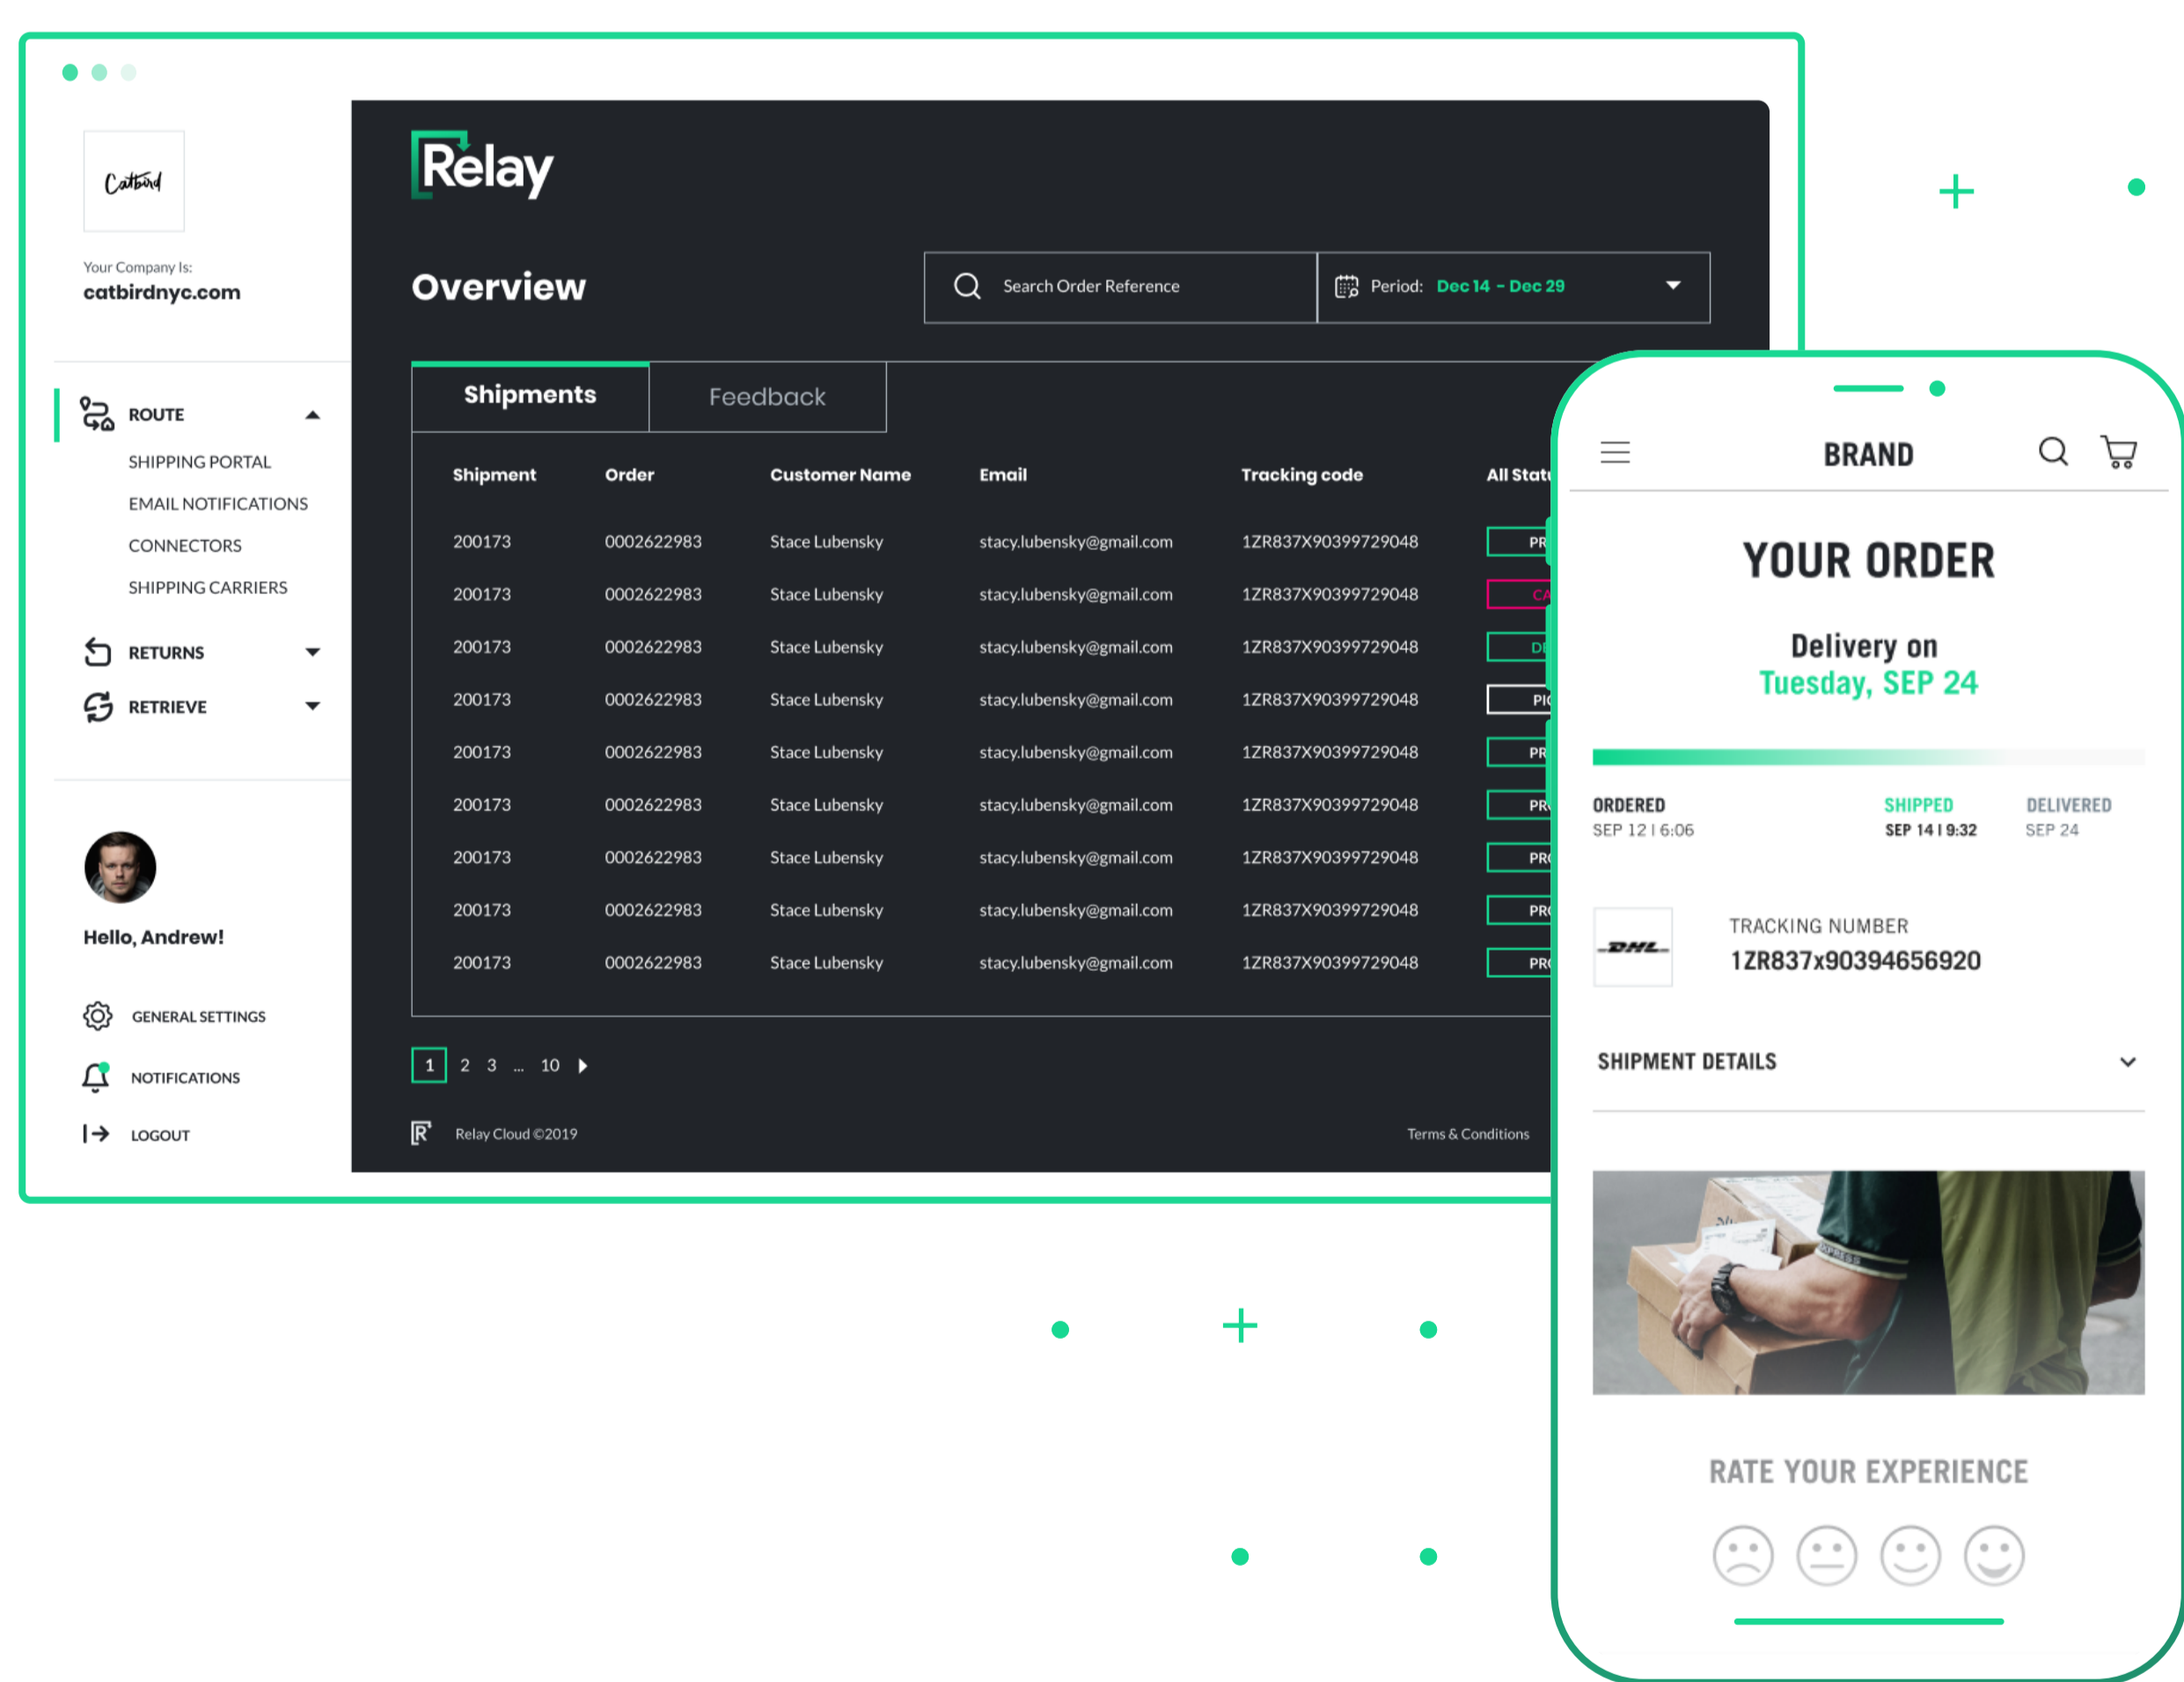

Relay automates everything that can be automated — and alerts your team when something needs their attention.

### Custom reporting tools

See how having access to real-time data and insights can improve every aspect of your customer experience.

**30 days — Average time it takes to implement Relay**

**Free up your customer service team to actually serve your customers.**

- Set rules based on SKU, price and many other variables
- Create custom emails and communication triggers
- Identify patterns to get ahead of fraud and shrink
